

Are you EMV ready?

Reduce fraud, not profit with EMVMadeEz.

Starting April 2021,
fuel merchants will
be liable for card
fraud & chargebacks

The EMV liability Shift is here

With the EMV liability shift fast approaching, fuel merchants are faced with the daunting prospect of expensive retrofits and costly downtime to meet the new compliance standards. With numerous EMV solutions on the market, many of which involve multiple vendors, discerning which partner to work with is challenging. The fast-approaching deadline of April 2021 means that merchants are looking for the quickest and easiest solution. Enter **EMVMadeEZ**.

Introducing: EMVMadeEZ

A cost-saving, fraud-reducing, pre-certified, plug & play, pay-at-the-pump solution that is EMV liability shift ready! TXECSS builds solutions that allow c-store merchants to update their existing, non-compliant, in-dispenser payment system, to the newest technology, for the overall lowest cost in market.

Forget Fraud

Never worry about chargeback and fraud liability again. Protect yourself and your customers with EMV security.

Decrease Expenses

EMVMadeEZ is the lowest-cost solution, providing a 60-80% reduction in overall costs than standard pump solutions and retrofits.

Single Vendor, Single Point of Contact

Reduce an already complex, stressful situation by not having to worry about managing relationships. TXECSS handles the partnerships, so you don't have to.

Smooth Retrofit

Integrate directly with legacy systems to eliminate downtime and greatly accelerate your speed to market, backed by our expert support and installation team for your peace of mind.

Did You Know?

Chargebacks cost an average of \$200 per investigation, on top of the funds being disputed.
